Stan Reiss

Stan Reiss is a general partner at Matrix Partners and has worked as a venture capitalist for nearly a decade. He focuses on components, systems, complex software, energy and clean tech products. His investments include Noble Peak Vision, a maker of CMOS image sensors, Xtalic, a nanostructured metal alloy and coating company, Qualtre, a startup developing novel MEMS-based inertial sensors, Intelliden, a developer of software to manage large communication networks, and Hyper9, whose software helps administer virtual environments. Stan obtained a bachelor's degree in electrical engineering from Cornell University, master's degrees in electrical engineering and operations research from MIT, and an MBA from Harvard. Prior to joining Matrix he worked in McKinsey's electronics practice.
